

Bringing new rebates and services to Enosburg-area farmers

Did you know energy efficiency can save you money, benefit herd health, improve milk quality, keep the barn comfortable, and boost revenue? You don't have to choose between paying your energy bills and keeping your farm afloat. There are easy ways to save money and energy at your dairy farm, greenhouse, or indoor growing operation. If you've ever wanted to improve the lighting, comfort, or air quality of your farm, now is the time.

This year, The Village of Enosburg Falls Water & Light Department, Efficiency Vermont, and Vermont Public Power Supply Authority are working together to offer free energy consultations and special financial offers for your farm. Working with an expert can help you identify the most cost-effective energy solutions for your operation. There are funding and financing options available to help you make the upfront investment. Get started by attending an upcoming event or visiting the website:
